

# Pokemon Journey ANDROID

by Samuel Levin and Sushant Adhikari

Pokemon Journey is a simple game which has been created over personal interest and school assignment

## Features

- It has a android icon
- It Moves
- It has a SQLite Database
- It has animation
- It has a interaction scenario

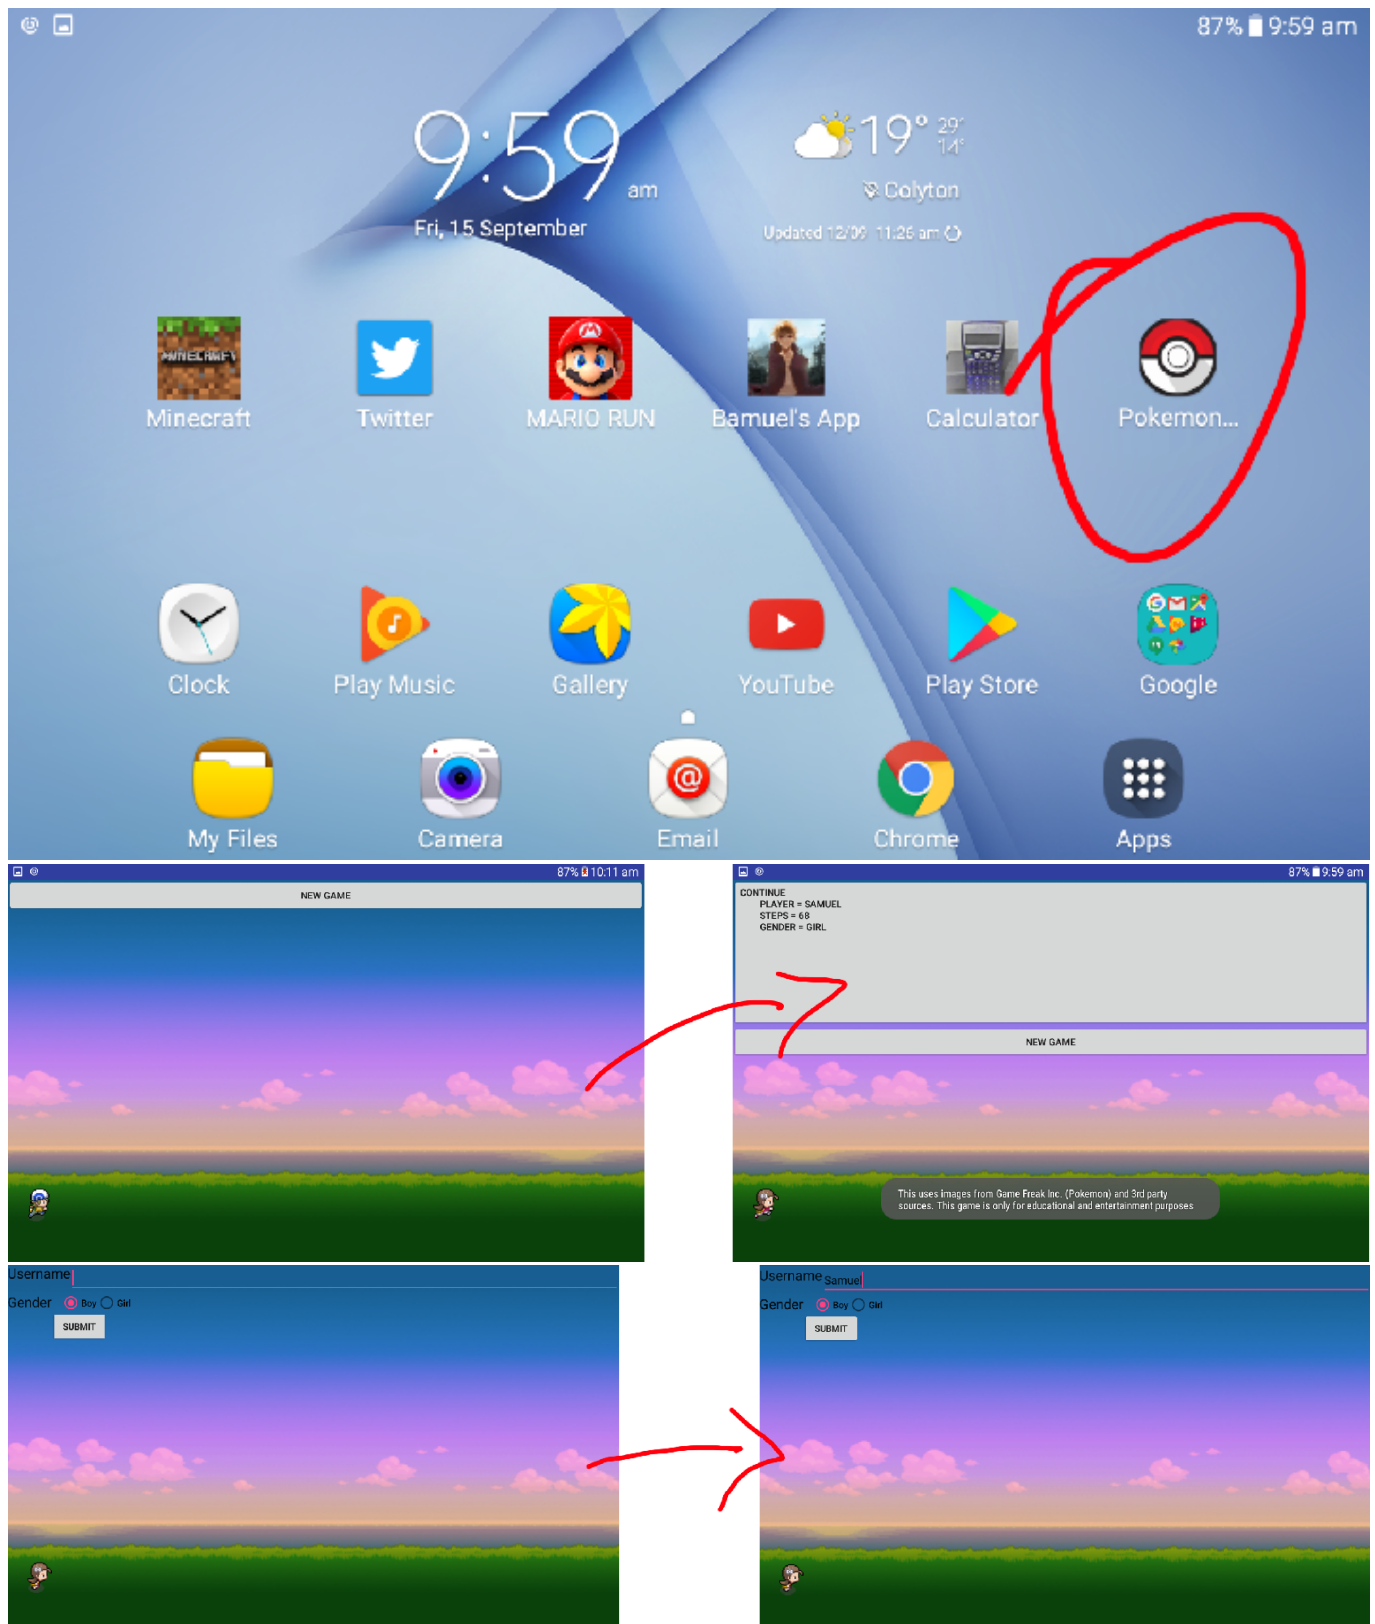

## Installation

Download the .apk file Run the .apk file on android device. Make sure you have allowed unsigned applications more can be found here

<http://yourbusiness.azcentral.com/install-unsigned-android-app-9807.html>

## Testing

Scenarios

- Clicking New Game Opens new activity and users can enter details - Enter

Username/Gender Saves in the SQLite database the username, gender and steps to Zero  
 Continue button should appear - Making Gender to Girl Sets all the male sprites to female  
 sprites - Pressing New Game again and entering details Overwrites the database - Pressing  
 Continue Opens a new activity to the main game

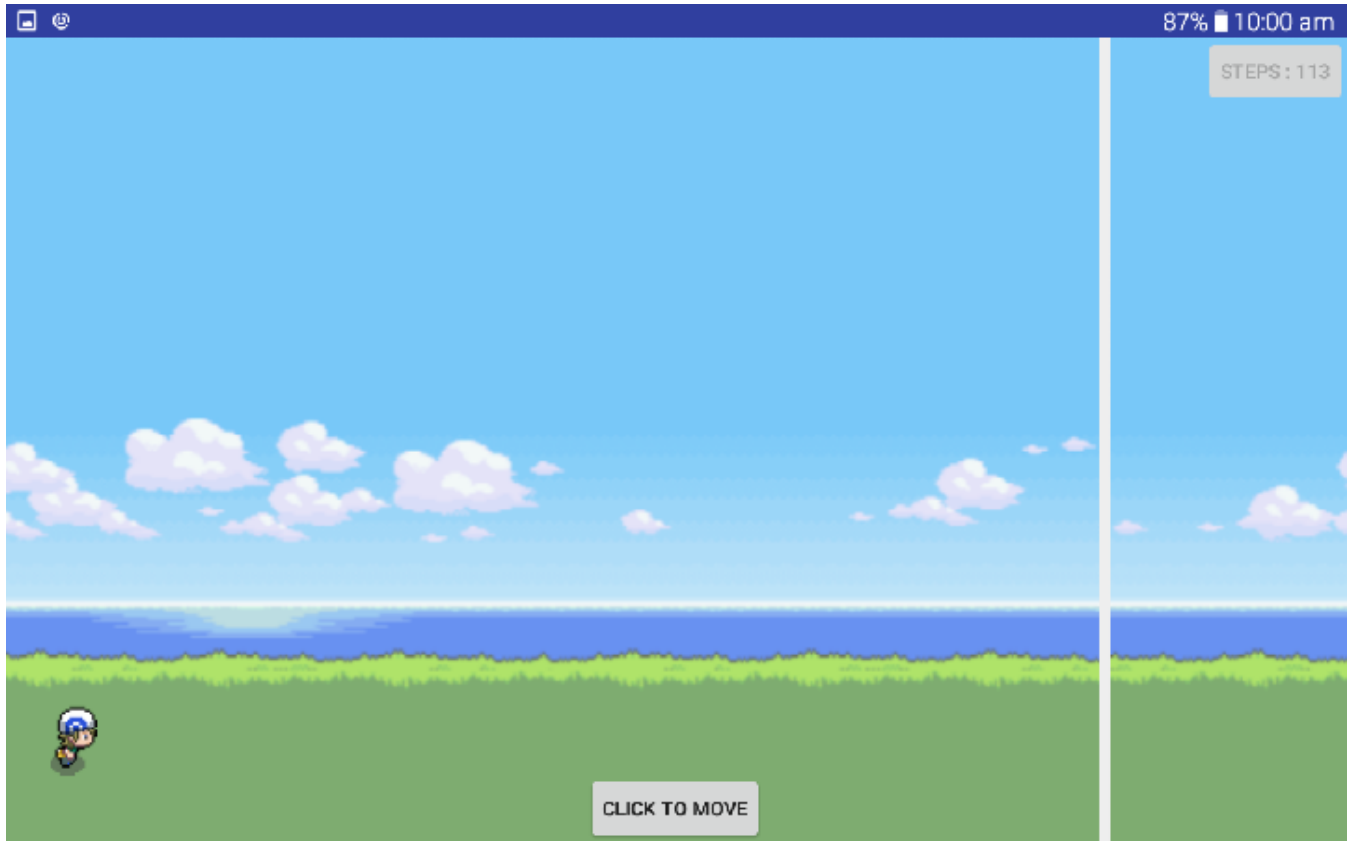

- Pressing 'Click to Move' Step counter will go up Moves the background to the left and sprite changes Randomly the button will change to 'Pokemon has appeared' Saves current progress to SQLite database - Pressing 'Pokemon has appeared' Send you to a new activity where a battle will comence

- Pressing any button will leave the battle activity

## Current Bugs

- a white line appears after a few steps
